

Silent books, from Lampedusa to the  
world and back

## General Assembly 2016

As you know thousands of migrants and children arrived on the coasts of Lampedusa this year. An IBBY library in the middle of the Mediterranean sea is essential for us, and for them.

2016 facts have made it clear to all that cooperation between sections around the Mediterranean and in Europe is vital. This IBBY library is an important challenge in this direction .

Everybody is Welcome!

Migrant refugees pass by and read or learn Italian from the children,

**There is a lot more to be done.**

It's a place to meet new cultures and understand who we are:  
**a library !**

Children have kept the library open and we have sent authors and volunteers with projects and activities.

Empowering the local community has been very important.
